

Criteria for assessment Internal self-funded PhD proposals

1. ***Scientific importance:*** is the research sufficiently outlined and theoretically imbedded? Are the research questions elaborated adequately? What is the relevance and significance of the research? Are the methods & techniques suitable for answering the research questions? Are the sources accessible and suitable for answering the research questions? Does the work plan have a realistic, logical composition and is it well phased?
2. ***Quality of the candidate:*** Is expertise on the research topic demonstrated in publications or thesis? Is there proof of the capabilities to work efficiently within set time limits?
3. ***Supervision (team):*** supervision at the Faculty is at least by two people. If the subject is not covered by the expertise of these supervisors, additional supervision may be recommended.
