Bibliography: Conflict in Syria (Part 3)

Compiled and selected by Judith Tinnes

[Bibliographic Series of Perspectives on Terrorism–BSPT–JT–2017–2]

Abstract

This bibliography contains journal articles, book chapters, books, edited volumes, theses, grey literature, bibliographies and other resources on the Syrian conflict. To keep up with the rapid changing political events, more recent publications have been prioritized during the selection process. The literature has been retrieved by manually browsing more than 200 core and periphery sources in the field of Terrorism Studies. Additionally, full-text and reference retrieval systems have been employed to expand the search.

Keywords: bibliography, resources, literature, Syria, conflict, uprising, civil war, Assad regime, rebels, opposition, Jabhat al-Nusra, Jabhat Fatah al-Sham, YPG, Russia

NB: All websites were last visited on 22.03.2017. This subject bibliography is conceptualized as a multi-part series (for earlier bibliographies, see: [Part 1](#) and [Part 2](#)). To avoid duplication, this compilation only includes literature not contained in the previous parts. However, meta-resources, such as bibliographies, were also included in the sequels. Literature focusing specifically on the “Islamic State” (a.k.a. ISIS, ISIL, Daesh) has been excluded as it is covered in a separate multi-part bibliography. – See also **Note for the Reader** at the end of this literature list.

Note

Whenever retrievable, URLs for freely available versions of subscription-based publications have been provided. Thanks to the Open Access movement, self-archiving of publications in institutional repositories or on author homepages for free public use (so-called Green Open Access) has become more common. Please note that the content of Green Open Access documents is not necessarily identical to the officially published versions (e.g., in case of pre-prints); it might therefore not have passed through all editorial stages publishers employ to ensure quality control (peer review, copy and layout editing etc.). In some cases, articles may only be cited after getting consent by the author(s).
