

Bibliography: Civilian Casualties of Terrorism and Counter-Terrorism

Compiled and selected by David Teiner

Abstract

This bibliography contains bibliographies, books, including edited volumes, book chapters, articles theses, and grey literature on civilian casualties of terrorism and counter-terrorism. It presents quantitative, qualitative as well as mixed-method approaches to provide a wide range of perspectives. This bibliography should not be regarded as exhaustive, considering the multidisciplinary nature of the field. For instance, publications on the use of drones (UAVs) are not fully reflected here as the literature in this particular area has grown considerably in recent years. Inclusion here would otherwise distort the thematic balance of this bibliography. Full coverage of the debate on the use of UAVs in conflicts will have to wait for a future stand-alone bibliography.

Keywords: civilians, casualties, indiscriminate violence, civilian immunity, targeted killings, genocide

NB: All websites were last visited on December 3, 2020 – See also Note for the Reader at the end of this literature list.
