

LEIDEN LEARNER CORPUS

Thank you for participating in the Leiden Learner Corpus! Here is how you can start:

There are three separate surveys:

1 - One individual speaking task

- + *Make sure that your device (for example, cellphone or computer) has a working microphone. You will record the task on the same device you opened the survey.*
- + *Try to find a quiet environment to record the task.*

2 - One writing task with a background questionnaire

- + *The task is easier to complete on a computer (laptop or desktop), than on cellphones.*
- + *The background questionnaire only needs to be completed once. If you have previously filled a background questionnaire for the LLC, you can indicate so in the survey and skip to the writing task!*

3 - Two interactive speaking tasks (in pairs)

- + *Try to find a quiet environment to record the task.*
- + *You will complete this task with a conversation partner. That can either be in person or through an audio call.*
- + *Both you and your partner should open the link on your own devices.*
- + *If you cannot meet in person, make sure that you and your conversation partner have a separate way of communicating (for example, Skype or Whatsapp).*
- + *Make sure that the device in which you open the link has a working microphone. If you are completing this through an audio call, this could be the same device in which you are calling your partner, or a different one.*

You can save your responses to the tasks and evaluate your own writing/speaking with the self-assessment rubric at the end of the survey.

Speaking tasks: follow instructions to download your audio file immediately after finishing recording.

Writing tasks: copy your text when it is displayed at the end of the survey
