

MASTER'S PROGRAMME

Crisis and Security Management

SPECIALISATION MASTER'S PROGRAMME

Cybersecurity Governance

FACULTY

Faculty of Governance and
Global Affairs

INSTITUTE

Institute of Security
and Global Affairs (ISGA)

Content of the Programme

In a world that increasingly relies on networked digital technologies, cybersecurity has become a pressing concern. In recent times, academics, governments and organisations have come to realise that cybersecurity is not only a technical issue, but also involves questions of governance and policy making, law and regulations, politics and international relations, and economics and psychology.

In the track Cybersecurity Governance, you will be familiarised with the breadth, depth and complexity of cybersecurity challenges from a governance point of view and to find creative and workable solutions to address these challenges. This includes gaining expertise and skills in a range of disciplines such as law, international politics, behavioural sciences and criminology. As the programme focuses on the governance aspects of cybersecurity, we do not expect prospective students to have in-depth technical knowledge on cybersecurity before starting this specialisation track.

We are looking for students with a keen interest in cybersecurity as a policy field and the desire to know more about this fascinating topic and how to solve the challenges of the 21st century.

Additional information

- ▶ Start date: September
- ▶ Duration: 1 year
- ▶ Degree: Master of Science Crisis and Security Management (MSc)
- ▶ Location: The Hague
- ▶ Language: English
- ▶ Mode of study: Fulltime
