

## MASTER'S PROGRAMME

# Crisis and Security Management

## SPECIALISATION MASTER'S PROGRAMME

### Governance of Crisis

## FACULTY

Faculty of Governance and Global Affairs

## INSTITUTE

Institute of Security and Global Affairs (ISGA)

## Content of the Programme

Crises such as hurricanes, system blackouts, pandemics and terrorist attacks are considered serious threats to the basic functioning and fundamental values of modern societies. They challenge public and private organisations in terms of business continuity, providing safety and security, and responding to threats and emergencies.

In the track Governance of Crisis, you will engage with research from multiple academic disciplines. Combined with the in-depth study of empirical cases, you will learn the main concepts, processes, challenges, and dilemmas of crisis management. Special attention will be paid to what effective crisis management entails, the role of leadership and organisations in crisis management, citizen responses to crises, and the politics of crisis management.

In this track, you will be familiarised with:

- ▶ what causes crises and what societies do to prevent and prepare for them;
- ▶ the role of crisis responses in order to minimise damage and impact in the long run;
- ▶ the dynamics, consequences and challenges of post-crisis governance.

We teach you research skills and professional labor-market oriented skills using several activating working methods, such as serious games, setting up your own survey, group discussions, individual presentations, a scenario-workshop, providing strategic communication advice, and writing policy briefs based on comparative analysis.

## Additional information

- ▶ Start date: September
- ▶ Duration: 1 year
- ▶ Degree: Master of Science Crisis and Security Management (MSc)
- ▶ Location: The Hague
- ▶ Language: English
- ▶ Mode of study: Fulltime
