

RESEARCH CLINIC

General information

Supervisor:	Judi Mesman / Rosanneke Emmen
Title of clinic:	Ethnic socialization in family context
Number of students:	Max 6
Major (<i>if applicable and approved by the Major Convener</i>):	Can count towards HD for a maximum of 3 students (approved by MC), but open to students from all majors.
(Pre)requisites (<i>if applicable</i>):	For the Chinese sample: fluent in Cantonese (or Mandarin) For the Dutch And Afro-Dutch sample: fluent in Dutch For the Turkish-Dutch sample: fluent in Dutch or Turkish

Research context

In this project, we study how and what parents teach their children about ethnic identity and interethnic relations, involving home visits to families to collect data through interviews, video observations, and standardized computer tests in the following four cultural groups in the Netherlands: Dutch, Turkish-Dutch, Afro-Dutch, and Chinese. See website (in Dutch) for participants for more information: <https://www.universiteitleiden.nl/onderzoek/onderzoeksprojecten/governance-and-global-affairs/kids>

LEARNING AIMS

- Acquire skills in systematic data collection in the behavioral sciences, involving families from different cultural backgrounds
- Understand the main theoretical frameworks involved in ethnic socialization

ACTIVITIES:

- background reading and discussion
- training in data collection protocols
- contribution to recruitment of participants (for Chinese sample only, the others have been recruited)
- conducting home visits for data collection
