

## RESEARCH CLINIC

### General information

Supervisor:	David Ehrhardt
Title of clinic:	Field survey design and implementation in Nigeria
Number of students:	1-4
Major ( <i>if applicable and approved by the Major Convener</i> ):	GED
(Pre)requisites ( <i>if applicable</i> ):	QRM preferred

### Research context

Who do urban Nigerians go to for basic services, such as education, health care, conflict resolution, and social services? And what are the functions of traditional authorities (e.g. chiefs, emirs, obas) in the provision of these services, and in particular in conflict resolution? Those are the basic research questions of this fieldwork project in different cities in Nigeria. The project as a whole will collect legal documents, interviews (life histories), video material, and survey data; but this clinic will largely be focused on the survey component (which will be enumerated using tablet pc's). During the fall of 2018, a perceptions survey will be developed and tested in The Netherlands and subsequently implemented in three (or four) cities in Nigeria.

### Students' tasks and activities

*Students will participate in:*

- *designing the survey,*
- *piloting the first version in The Netherlands,*
- *coordinating the data collection from Nigeria,*
- *preliminary data analysis.*

*Learning aim is to participate in:*

- *Survey design*
- *Survey piloting*
- *Online data collection*
- *Survey data analysis*

*Assessment:*

- *Contribution to survey design*
- *Piloting evaluation report*
- *Contribution to online data collection procedure*
