

# Application Form

## Course description for application Master in Psychology (clinical specialisations)

In addition to the admission requirements, students who want to apply to one of the clinical specialisations of the Master in Psychology need to demonstrate how they score on the selection criteria:

Selection criterium 1 is a good academic record as indicator for academic excellence. Applicants must use the form on the following pages to show their achievements in three domains.

If you have taken multiple courses that correspond to the required topic, fill in the course that best meets the topic or qualitative selection criteria. You can fill in the same course for two different topics, in that case the grade can only be counted once for the weighted average. It is recommended to use a different course for each topic (if possible). There is room for additional courses at the last page of this document. Please indicate clearly to which requirement these optional additional courses pertain.

If you encounter difficulties filling out this form, please see our [Frequently Asked Questions](#) (note, the FAQ content is the same for all clinical specialisations).

## Completing this form is mandatory for application to the clinical specialisations of the Master in Psychology.

Requirement 1:

- a. The results earned in the bachelor on **general psychology** courses on the following topics (*at least 24 ec - please make sure to list only 1 course per topic*):
  - Introduction to psychology
  - Social and/or organisational psychology
  - Cognitive psychology
  - Neuropsychology and/or psychophysiology and/or biopsychology
  - Clinical psychology
  - Developmental psychology
- b. The results earned in the bachelor on courses pertaining to the **clinical domain** (*at least 3 courses (minimum 4 ec each), max 1 course per topic*) on the following topics:
  - Psychodiagnostics
  - Interpersonal skills, such as interview, counselling
  - Psychopathology and/or psychological treatment
- c. The results earned in the bachelor on courses pertaining to knowledge and skills in **methodology and statistics** (*at least 20 EC on basic and advanced level*), including the following topics:
  - Psychometrics
  - Multivariate Data Analysis
  - Skills with statistical software, such as SPSS

*Keep in mind that the admission requirements and the selection process are two separate steps in the admissions process. This form is part of the selection process. Only applicants that meet the admission requirements can participate in the selection process.*

## Student information

Name:

Leiden University Student number:

University where the bachelor courses are obtained:

## Summary of courses for selection requirements - Please make sure to list only 1 course per topic

Requirement 1A <b>General Psychology</b>	Course	Grade <sup>1</sup>	EC <sup>2</sup>
1. Introduction to psychology
