

Erratum – Empower your PhD – Stimulating adaptability and self-management of personal and career development in PhD candidates

Date of correction 28 October 2025

After publication of the advisory report, an error was identified in the data processing that resulted in an incorrect version of one figure.

This erratum provides a corrected version of *Figure 1* (page 10) from the report Empower your PhD – Stimulating adaptability and self-management of personal and career development in PhD candidates.

The original figure contained an error due to an incorrect recoding of one item in the dataset. Specifically, item 2 of the Academic career competencies should have been reverse coded.

The corrected figure is presented below.

This correction **does not affect the results, interpretations, or conclusions** of the report.

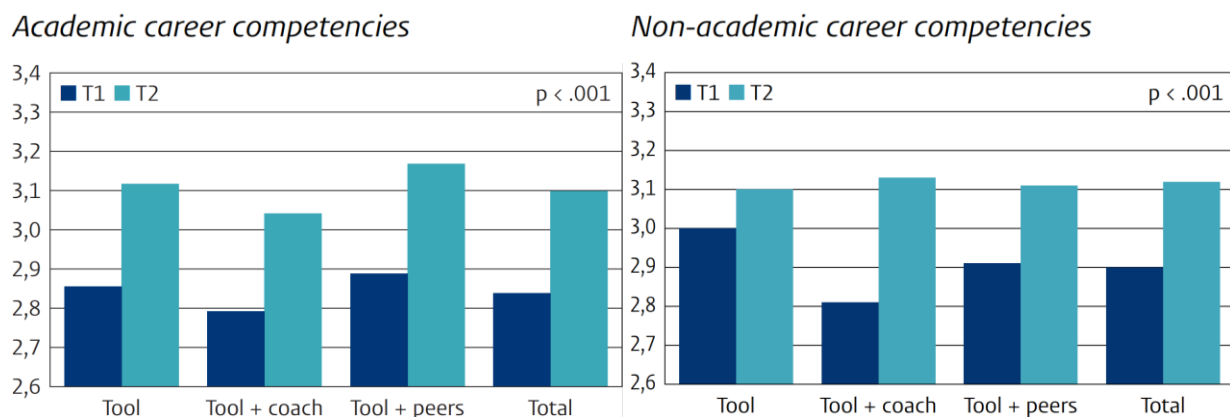

Figure 1. All three programs potentiated career competencies. We found an overall increase in terms of career competencies from baseline to post-intervention. This increase was observed for both academic career competencies (left) and non-academic career competencies (right). No differences were found between the intervention groups in terms of career competencies.
