

Monitoring social behaviors with information technology

Symposium on June 25

Time: 10.00-12.00 hrs
Coffee at 9.30 hrs

Place: At PLNT
Address Langegracht 70, Leiden (go upstairs)

Speakers:

- **Maarten van Steen, TU Twente:**
WiFi tracking in practice - measuring the TT festival in Assen
“Although it seems as if we can easily follow people’s movements, correctly detecting devices can be particularly difficult, especially in outdoor environments”
- **Theo Bakker, Ilja Cornelisz & Chris van Klaveren, Vrije Universiteit:**
Student Analytics / Amsterdam Center for Learning Analytics (ACLA)
“A Machine Learning Monitoring System to Make Early, Stable and Actionable Study Success Predictions”
- **Carolien Rieffe, Leiden University:**
Children’s playground behaviors using sensor data; Inclusion or Exclusion?
“With sensor data we can measure how successful mainstream education is for different children socially”
- **Alexander Koutamanis, TU Delft:**
Data, affordances and the built environment
“Our actions are constrained or stimulated by how the built environment has been designed, constructed, organized and maintained”

**Universiteit
Leiden**
