Specialisations

- Governance of Violence (MSc)
- Governance of Crisis (MSc)
- Governance of radicalism, extremism and terrorism (MSc)
- Cybersecurity Governance (MSc)
- War and Peace Studies (MSc)
- Intelligence and National Security (MSc)

Crises arising from terrorism, war, violence, cyber threats, and natural disasters dominate world news and make Crisis and Security Management a heavily politicised and hotly debated topic at the top of the national and global societal and governance agenda.

You will choose one specialisation before the start of your programme. A specialisation consists of a coherent set of courses aimed towards gaining specific skills and knowledge, and cannot be switched during the year.

Larissa Verkaik

Alumna

"This master's programme offers a unique multidisciplinary approach to the broadening concepts of crisis and security issues. The main advantage of the programme is that we get the chance to apply the academic perspectives we learn in class to real-life situations. This really demonstrates the importance and relevance of the study".

Adrian Zacharias

student from Germany

"A perk of this programme is definitely its location. Entirely taught on Campus The Hague of Leiden University it offers a great opportunity for students or recent graduates to pursue a career in one of the many international organizations based in the city or yet private companies in proximity of these institutions. The lecturers are particularly easy to approach and always open to give feedback on your work or give assistance on other academic matters."

What does this master's programme entail?

The master Crisis and Security Management is a programme built around four modules in which substantive knowledge, research skills and professional skills are integrated. Based on activating working methods and enquiry-based learning, the programme prepares students to become reflective, academically trained crisis and security professionals working in the public, private and civic sector.

During this multidisciplinary career-relevant master's programme you will become familiar with the academic, political and societal dimensions of the governance of (in)security and crisis. You will study contemporary security challenges from both local and global points of view, gaining a deep understanding of the 'wicked problem' of security and crisis topics in a complex and globalising world. Students graduate on the basis of a portfolio and reflection paper showing how they acquired the learning outcomes of the programme.

This one-year, English-taught programme is the only academic Master's programme that offers insights on general developments as well as the specific challenges in the field of the governance of crisis and security, with in-depth knowledge of sub-fields of crisis and security management. By selecting one track that suits your interest, you will be able to become a security professional with specialized knowledge and skills combined with a deep understanding of the general field.

Reasons to choose CSM at Leiden University in The Hague

- You will both gain insights on general developments and challenges in the field of the governance of crisis and security and in-depth knowledge on the sub-fields of crisis and security management;
- You will study real-life cases in an international community;
- You will gain insights on all phases of crises and disaster management;
- You will develop your academic, analytical and professional skills;
- This programme is unique in the Netherlands because of the combination of the common courses and the track courses;
- This programme is taught in the Centre of The Hague, the international City of Peace, Justice and Security.

[Why Leiden University](#)

Is CSM the right programme for you?

This full-time one-year Master's programme is unique in the Netherlands because of the combination of the common courses and the track courses, and the emphasis on both academic and professional skills. There is ample room to gain in-depth and extensive knowledge and to develop vocational skills. The programme is aligned closely with the Bachelor Security Studies, but students from a wide range of disciplines are welcome to enrol.

- Are you curious about and interested in the complex challenges our society is facing in the field of security and crisis?
- Would you like to participate in discussions about and contribute to creative, balanced solutions for these challenges?
- Are you looking for an education that will allow you to delve into your chosen specialist field?
- Do you believe it is important to develop the skills employers are looking for and that will allow you to get ahead in your career?
- Are you someone who does not like it when information is simply handed to you during classes?
- Are you eager to delve into challenging assignments that will allow you to develop your research skills?
- Do you sit up and take notice when it comes to innovative teaching methods such as serious gaming?

Then this is the Master's programme for you.

Chat with a student

Do you have a question about studying at Leiden University or student life in Leiden or in The Hague? Do you want more information about the Crisis and Security Management programme? [Chat with a current student](#) for answers to your questions!

Why Leiden University?

In an increasingly complex and security-challenged society, the CSM programme provides you with the theoretical and practical skills to understand the issues underlying security challenges and develop solutions for crisis and security management.

You will join the only master's programme in the Netherlands to offer six unique specialisations within the field of crisis and security management. With a broad curriculum and flexible design, this Master's degree allows you to tailor your degree to suit your career goals. Six specialisations are available, each with their own thematic focus, and each with further scope for customisation. You will be able to specialise in areas of Terrorism, Crisis Governance, Violence, War & Peace, Intelligence and Cyber.

Reasons why you should study CSM in The Hague

- Your lecturers come from a wide variety of academic and professional backgrounds in addition to coming from the Institute of Security and Global Affairs;
- Many are associated with think tanks, research institutes and NGOs;
- The Hague is home to such organisations as NATO, Upeace, and the ICCT;
- An ideal environment in which to study, intern, and research;
- You study in the Wijnhaven Building just minutes from The Hague Central;
- Employment opportunities in and around The Hague;
- The Hague is the Netherlands' fastest-growing student city and it boasts international allure.

Study at the Faculty of Governance and Global Affairs

The faculty studies current topics such as climate change, terrorism, and (economic) crises. With her interdisciplinary approach, the faculty connects with the surrounding national and international organisations. Located in The Hague, city of peace, safety and law, our students and researchers look at 21st century issues through a combined perspective of public administration, political science, law, sociology and economics. This interdisciplinary approach gives the Faculty's research and teaching its cross-border character.

Study at a world-class university

Leiden University is the oldest university in the Netherlands and enjoys an excellent worldwide reputation built up over more than four centuries. Since 1575 we've provided sound personal education for hundreds of thousands of students. We'll do our utmost to give you the best possible support. And if you can and want to do more, we'll challenge you every step of the way. For many years, we've been among the leaders in Dutch university rankings and we are currently to be found in a variety of [top international rankings](#) too.

About the programme

In the Master's programme Crisis and Security Management, you will study contemporary security challenges from both local and global points of view, gaining a deep understanding of the 'wicked problem' of security and crisis topics in a complex and globalising world.

Programme overview

This full-time one-year Master's programme is unique in the Netherlands because of the combination of the common courses and the track courses, and the emphasis on both academic and professional skills. There is ample room to gain in-depth and extensive knowledge and to develop vocational skills. Every track includes 4 track modules as well as 3 common courses.

When applying for the programme, you need to submit your preferred specialisation. A specialisation consists of a coherent set of courses aimed towards gaining specific skills and knowledge.

By selecting one specialisation that suits your interest, you will be able to become a security professional with specialized knowledge and skills combined with a deep understanding of the general field. During the year, you cannot switch specialisations since these consist of a coherent set of courses aimed towards gaining specific skills and knowledge.

Specialisations:

- [Governance of Crisis \(MSc\)](#)
- [Governance of radicalism, extremism and terrorism \(MSc\)](#)
- [Cybersecurity Governance \(MSc\)](#)
- [Intelligence and National Security \(MSc\)](#)
- [War and Peace Studies \(MSc\)](#)
- [Governance of Violence \(MSc\)](#)

Nicolas Castellon

Cyber Security Professional

“The Master has opened many doors for me academically and professionally. I selected this master’s program as it offered a governance perspective into crisis and security issues that other traditional degrees did not offer.”

Multidisciplinary programme

The Master of Science programme in Crisis and Security Management is an academic programme that emphasises the ability to understand and analytically apply multidisciplinary insights from Security Studies, Public Administration, Political Science, Law, International Relations and other disciplines to challenges of crisis and security management.

Teaching methods

Usually, people enrol in a course to obtain more knowledge and insights but you would also like to work on your skillset. This master allows you to do both. Learning by doing is central to this master. This includes innovative teaching methods such as serious gaming. You will learn how to work together in teams, how to present findings to different audiences and how to self-direct your learning. Theoretical knowledge is always enriched with real-life cases enabling students to become academically trained professionals.

Student support services

Sometimes students need extra support or advice before or during their studies at Leiden University. This may take many forms: maybe you need the help of a Study Advisor, or to speak with a student psychologist about personal issues, or you experience chronic illness such as physical or psychological difficulties or dyslexia.

Accept cookies

Programme structure

This one-year, English-taught Master's programme offers insights on general developments as well as the specific challenges in the field of the governance of crisis and security, with in-depth knowledge of sub-fields of crisis and security management.

Courses

The CSM programme consists of three common courses of 4 or 5 ECTS each. Next, you choose a specialisation that consists of four coherent courses of 10 ECTS each. Further, one elective of 5 ECTS completes the CSM curriculum. Students graduate on account of a portfolio and reflection paper, showing how exactly they met the learning outcomes of the programme.

Programme outline

The CSM programme consists of three common courses of 5 or 4 ECTS each. Additionally, you take part in four specialisation courses of 10 ECTS each and one elective of 5 ECTS. The final 1 ECTS can be obtained in the Portfolio course.

Main Courses

Security Challenges in a Globalizing World (4 ECTS)

In this course, students get acquainted with the underlying social, economic, political and cultural changes of late-modernity that influence perceptions of (in)security and critically discuss the concept of ontological security. This course addresses transformations in society that produce ontological insecurity, like globalisation and hybrid threats. Further, the course will look into the renewed search for ontological security, as manifested in populism, identity politics, re-territorialisation, nationalism and nostalgia.

Security: Actors, Institutions and Constellations (5 ECTS)

The provision of security has increased in complexity over time. The public provision of security is divided amongst several public entities, the pure public provision of security is deemed an illusion, and citizens demand a role in this framework as well. The very concepts of internal and external security become fluid as well, not in the least because of the growing importance of cyber security. Lastly, this multi-actor approach plays in a multilevel setting. In this course, students discuss the different theories on how security can be provided in the most effective way, and what repercussions this has for the organisational structure of security actors.

Security and the Rule of Law (5 ECTS)

Democracies today continue to wrestle with shifting and rapidly evolving threats stemming from conflicts, state coercion, and a variety of security concerns. Differently from other political systems, societies upholding the rule of law require policy and legal responses to respect balances and protect civil, social and human rights. Hence, how can states ensure safety while respecting a democratic legal framework? What kind of powers and responsibilities characterise democratic security governance? The aim of this course is to bring together different theoretical and methodological approaches in order to address these questions. Specifically, the seminars are designed around seven dilemmas related to security and the rule of law addressing both national and international politics.

Elective (5 ECTS)

In Block 4, students are required to pick one elective of 5 ECTS. Find the overview of the electives offered in 2023-2024 [here](#).

Portfolio (1 ECTS)

You will acquire substantive knowledge and (research) skills throughout the CSM-programme, especially in the specialisation courses where assignments are tailored towards testing specific research skills: literature review, data collection, analysis of complex situations and phenomena, and critical review of standing research.

In your portfolio, you include assignments produced during the specialisation courses and common courses, showing the (research) skills and competencies acquired.

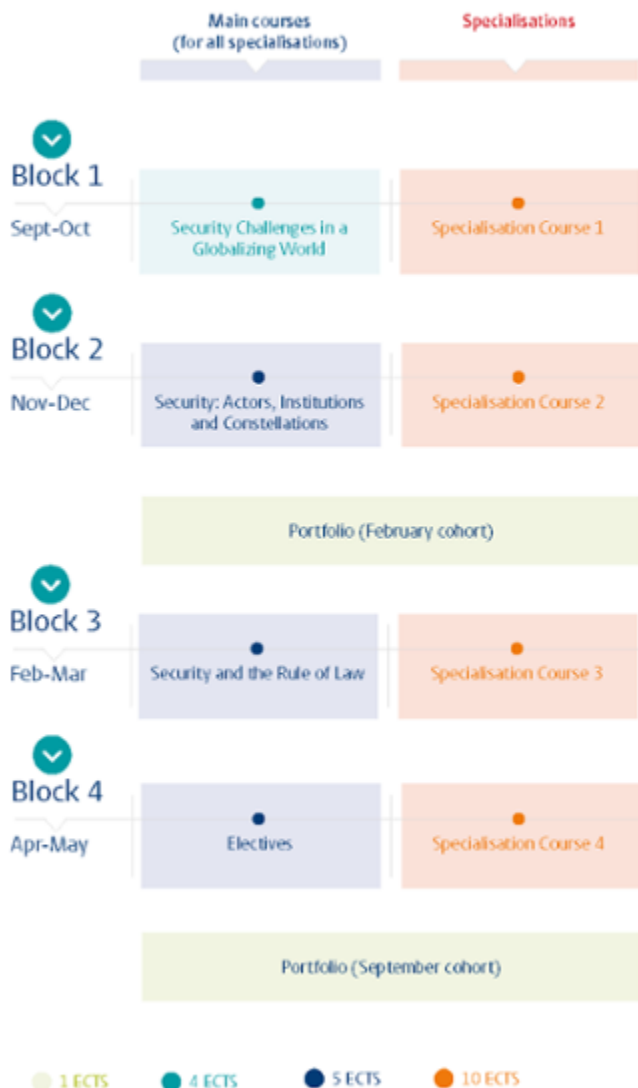

The portfolio also functions as a showcase for future employers: you can not only show to employers skills obtained, but also the research papers they produced. The portfolio therefore is also part of the labour market preparation in the CSM-programme.

Additionally, the portfolio has to be accompanied by a reflection paper and problem analysis assignment. In the specialisation courses and common courses you have to produce short interim reflection papers, that serve as the basis for the final reflection paper.

In the final reflection paper, you reflect on your learning pathway in terms of (research skills) and general insight in Crisis and Security Management as developed during the programme. That way, you show your competency of self-directed learning and the ability to critically reflect on their competencies and achievement as a (future) reflective, academically trained security professional.

A defense meeting in which the portfolio, reflection paper and problem analysis assignment will be presented and discussed, is part of this course and function as the formal final step in order to graduate.

CSM Programme Structure

Programme structure

Please note: As of 2025 we will only offer a limited February intake: only the specialisation Governance of Violence will be open for registration in February 2025. If you would like to follow one of the other specialisations please consider applying for the September 2024 or the September 2025 intake.

Extra-curricular

Are you ready to take on an extra challenge during your Leiden Master programme?

Master Honours Education

Are you a curious and motivated master's student? The Honours Academy of Leiden University offers various kinds of extracurricular education, ranging from long-running programmes to short-term courses.

Leiden Leadership Programme

Are you interested in a leadership challenge? Join the [Leiden Leadership Programme](#) (LLP). This one-year programme will equip you with the leadership knowledge, insights and skills you need to increase your societal impact. You further your personal development through trainings, seminars and a practical assignment within an organisation, in which you learn to cooperate intensively with other professionals. With the LLP, you earn 15 EC in addition to your regular master's degree.

Master Honours Classes & Challenges

Would you like to further develop your academic skills and societal awareness? Join one of our [Master Honours Classes & Challenges](#). In a small-scale, interdisciplinary course, you will tackle a complex issue for society or for a specific partner organisation. You will learn about the latest scientific insights concerning the topic and cooperate in a practical setting, together with students from many different backgrounds. There are Master Honours Classes on offer for 5 or 10 EC.

Academic Excellence Programme CSM

CSM excellent students who have a strong wish to further develop and demonstrate their research skills - for instance, because they aspire to an academic career or another research-led career - have the opportunity to join an Academic Excellence Project. [Read more](#)

Career prospects

The combination of academic and professional skills taught in the CSM prepares you for a wide variety of careers in the rapidly expanding domain of security and crisis management, including public or private sector and policy-making positions.

Jip Barthen

Alumnus

"An advantage of the CSM programme is that I was allowed to choose my own topics and specialisations. Therefore I was able to do research in the fields of cybersecurity and privacy.

Already prior to my graduation I arranged an internship at De Nederlandsche Bank, concerning Business Continuity Management. During the internship, the position of Security Training & Awareness Coordinator became available, and I applied. Possessing cybersecurity knowledge, communication skills and my master's degree helped me to land this new position. Working days at DNB are extremely dynamic. My work mainly consists of organizing communication campaigns in order to make people aware of cybersecurity risks, but I also work for a security program concerning the payment infrastructure. Examples of relevant topics in my work are social engineering, espionage, and hacking."

Bianca Alessandra Ruiz

Alumna (2020)

'At CSM, we learned about the global security landscape in various courses such as security & the rule of law (my favorite course!), intelligence studies, crisis management, and terrorism. Here, we assessed global security issues through the political, environmental, and social lenses. On the one hand, I enjoyed my experience as a student as we had engaging class discussions, work groups, and simulations/serious games. We also had accommodating professors and study advisors -- all of whom I'm grateful for. On the other hand, I've been enjoying my social life at university and in The Hague. I've enjoyed the FGGA and CSM borrels, the nightlife, the beach, the parks, and ultimately, the memories I've had with amazing friends. At the moment, I'm job hunting which proves to be extra difficult during the pandemic. I wish to work as an international civil servant in crisis response, a political correspondent, or an investigative journalist.'

The CSM programme aims to educate students to become academically trained, reflective security and crisis professionals in a broad sense. It aims to teach students to develop a critical attitude, adopt a perspective of scholarly independence and a high level of self-directed and autonomous learning and functioning.

The programme strives to convey both general knowledge of the core themes and approaches in crisis and security management and specialised knowledge on the governance of radicalism, extremism and terrorism, the governance of crisis, cybersecurity governance, intelligence and national security, and war and peace. Furthermore, the programme emphasises the ability to reflect on the ethical and normative dimensions of crisis and security management and their consequences for the behaviour of government officials, agencies, actors in civil society and private sector.

The graduate is thus capable of recognising and analysing a broad range of complex and wicked problems in the domain of crisis and security management, both at the local, the national and the international level. The graduate is able to undertake independent research at graduate level, applying a broad range of theoretical and analytical approaches relevant to crisis and security management.

Skills after graduation

Once you have obtained your master diploma, you will be ideally equipped to enter the labour market. Because of your specialist knowledge and skillset you will have a world of options available to you, both in the public and in the private sector. There are, for instance, many strategic and challenging opportunities working for a ministry, embassy, European institute, NGO, or local administration but also plenty of opportunities working for consultancy firms or working as a consultant for private security companies.

Positions held by our alumni

CSM graduates find employment in both the public and private sector, in a wide variety of positions. In the three months after graduation, almost 63% of graduates land their first job. After the first year, this is nearly 92%.

Example Positions

This MSc provides you with the tools to tackle emerging security and crisis issues through a governance perspective. After completing CSM, graduates work in the private or public sector, in positions in policymaking departments in all levels of government, or strategic positions in international organisations and NGOs, consultancies, or industry. Positions include:

- Consultant
- Policy officer
- Crisis response coordinator
- Network security manager
- Research assistant
- (Business) Analyst
- PhD candidate

Career preparation

During the CSM programme, you will have interactive guest lectures with professionals active in the security domain. The guest lecturers will speak about their career (development) and how they reached their goals.

Further, as part of labour market preparation, the programme emphasizes both academic and professional skills deemed important by the professional field, such as self-reflection, the competency to work together in multidisciplinary and multicultural teams, the ability to analyse complex problem and a problem-solving attitude.

Career Services

Leiden University's career counsellors give advice and information during your master and also after graduation. Each of Leiden's seven faculties has its own career services department, with specific expertise related to that faculty's programmes.

You have access to our web-based resources, which include career step plans, job seeking strategies and self-assessment tools. The Career Services desk also offers a range of relevant workshops.

See the [Leiden University Career Zone website](#).

Admission and Application

Find out how you can apply for Crisis and Security Management at Leiden University by following our step-by-step guide. When applying for the programme, you need to submit your preferred specialisation.

Admission requirements

To be eligible for MSc Crisis and Security Management at Leiden University, you must meet the following admission requirements.

2024 - 2025

Admission requirements for students who will start in September 2024 and in February 2025.

Please note: As of 2025 we will only offer a limited February intake: only the specialisation Governance of Violence will be open for registration in February 2025. If you would like to follow one of the other specialisations please consider applying for the September 2024 or the September 2025 intake.

Holders of one of the following degrees may be admitted to the programme:

1. Direct admission:
When you have a bachelor's degree in Security Studies, Public Administration or Political Science from Leiden University, you can be directly admitted. You can register through Studielink without needing to complete an application in Leiden University's application system (Usis).
2. Eligible for direct admission:
When you have a bachelor's degree in Public Administration, Political Science or International Relations from a recognised research university other than Leiden University you are eligible for

direct admission. Register through Studielink and [complete your application in Leiden University's application system](#) (uSis).

3. A bachelor's degree from an accredited research university provided the student meets requirements across two pillars. First, at least 30 ECTS obtained from courses in the fields of governance, crisis or security related knowledge. Second, at least 20 ECTS related to empirical research skills in social sciences or similar empirical research skills. Register through Studielink and complete your application in Leiden University's application system (uSis).
4. When you have a bachelor's degree in Safety and Security Management Studies (SSMS) at The Hague University of Applied Sciences and have fulfilled the [following academic criteria](#).
Please note: you will have to apply through Studielink and the subsequent uSis application portal. Further, you still must meet the English language proficiency requirement mentioned in the paragraph 'Language Requirements' below.

If you meet the conditions under 1, you only need to apply through Studielink. If you do not meet the conditions under 1, you will need to apply through Studielink and through the online application system (uSis). You will be assessed on an individual base on [proficiency in the English language](#) and the requirements mentioned in 'Elaboration'.

As this study programme is taught in English and all study activities must be undertaken in English, it is essential that you have a good level of proficiency in written and spoken English.

The following requirements apply:

- [IELTS](#) Academic modules only, on paper or on computer: 6.5 overall, with at least 6.0 for each separate component score.
 - We do **not** accept [IELTS Academic online](#).
 - We do **not** accept IELTS General Training or IELTS Indicator.
- [TOEFL](#) internet based: 90 overall, with at least 20 for each separate component.
 - We are **not** able to accept The TOEFL IBT Home Edition™, except in the following situations only:
You took the test before 1 Sept 2022 (and it is not more than 2 years old), or you are unable to take an in-person test on location because test centres are inaccessible or closed due to unsafe conditions in a country.
 - We do **not** accept the following types of test: TOEFL My Best™ scores (multiple test scores combined), TOEFL Essentials™ or institutional tests such as ITP.
- [Cambridge English Exam](#) C2 Proficiency, or C1 Advanced (180), with a minimum score of 169 for each separate component.

Note that English test results may **not** be more than two years old.

You do not have to submit an English proficiency test if you have completed your education in the USA, UK, Ireland, New Zealand, Australia, Canada (except French-taught programmes in Canada) Singapore, South-Africa or Malta; or if you have obtained an English-taught International Baccalaureate™; or if you have completed a Dutch VWO diploma or an English-taught bachelor at a Dutch research university.

For detailed information, including exemption criteria and methods of submission, refer to [English language proficiency](#).

Holders of a bachelor's degree from a research university with a maximum of 5 ECTS of deficiencies, can eliminate their deficiencies in the curriculum by showing relevant knowledge with their extracurricular courses as shown on the below table:

Pillar 1: Governance, crisis and security related knowledge	At least 30 ECTS obtained at a recognized research university in courses in the field of governance, crisis or security knowledge.	If you do not meet the requirements specified in the cell to the left, and your deficiency is a maximum of 5 ECTS, this can be bridged by doing 3 MOOCS on governance, crisis and/or security by a recognized research university. Official certificates must be obtained for these courses. Examples are: MOOCS related terrorism studies, crisis governance, cybersecurity governance, and risk in a modern society, etc
Pillar 2: Empirical research skills in social sciences	At least 20 ECTS of the course curriculum at a recognized research university is related to empirical research skills in social sciences. Please note that ECTS obtained for a thesis are only considered when it concerns an empirical research project in the social sciences.	If you do not meet the requirements specified in the cell to the left, and your deficiency is a maximum of 5 ECTS, this can be bridged by doing 3 MOOCS on empirical research skills in social science by a recognised research university. Official certificates must be obtained for these courses. Examples are: MOOCS related to quantitative research methods, qualitative research methods, research design, social science methods, etc.

The above elaboration on the requirements give an indication whether you will be admitted or not. At the same time, there are no assurances given. The first step by the Board of Admission is to examine the degree obtained. If this degree significantly differs in content from the master programme (e.g.: a degree in biology, physics, mathematics, industrial engineering, language studies), it will not be possible to bridge these deficiencies by online courses.

- Bachelor degree in international studies:
watch out for deficiencies in research skills. Make sure to submit writing samples, follow electives that are methodological in nature, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in criminology:
watch out for deficiencies in the governance aspect. Make sure to follow electives that include this (e. g. on the organization or management of police forces), and complete the online courses if there is still a maximum 5ECTS deficiency.

- Bachelor degree in history:
watch out for deficiencies in the governance aspect, and brush up on research skills. Make sure to submit writing samples, follow relevant electives, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in law:
watch out for deficiencies in crisis and security related topics (a course on criminal law is as such not sufficient), and especially research skills. Make sure to submit writing samples, follow relevant electives, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in psychology:
watch out for deficiencies in the governance aspect. Follow relevant electives, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Master degrees in the above fields:
a Master degree should strengthen your knowledge on at least empirical research. Make sure to submit writing samples.
- Bachelor or Master degree from a University of Applied Sciences (HBO):
though these programmes might touch upon one or even both pillars in the curriculum, they do so from a perspective of applied sciences. Hence applicants lack theoretical background needed to start the Master's programme. It will almost be impossible to adhere to the requirements.

Minor

Finally, a minor programme can be a great way to increase knowledge on the two pillars. Currently, the Institute of Security and Global Affairs offers five minor programmes, but other minor programmes may also prove valuable:

- [Security, Safety and Justice](#): the different courses touch upon each of the two pillars.
- [Intelligence Studies](#): the different courses touch upon each of the two pillars.
- [Global Affairs](#): the different courses concentrate on crisis, security and governance topics.
- [Violence Studies](#): the different courses concentrate on crisis, security and governance topics.
- [Cybersecurity and Cybercrime](#): the different courses concentrate on crisis, security and governance topics.

It is **not mandatory**, but to aid in your assessment, we highly recommend to include a placement letter in English, in which you explain how you meet the admission requirements. This serves to help the Board of Admissions gain further insight in your experiences (work and/or education) that might contribute to establish admissibility to the programme. Make sure to use [this template](#).

You can download the template, fill it in, and add it to your application. List relevant academic courses or other relevant academic experiences (such as internships, summer courses, thesis or extra-curricular research), including if applicable the amount of ECTS or credits assigned to them.

For everything you list, it is recommended you hand in supporting documents, such as course descriptions, syllabi or writing samples. You can upload supporting documents via the application portal in uSis (ideally, integrate the supporting documents into one pdf).

2023 - 2024

Admission requirements for students who will start in September 2023 and in February 2024.

Holders of one of the following degrees may be admitted to the programme:

1. Direct admission:

When you have a bachelor's degree in Security Studies, Public Administration or Political Science from Leiden University, you can be directly admitted. You can register through Studielink without needing to complete an application in Leiden University's application system (uSis).

2. Eligible for direct admission:

When you have a bachelor's degree in Public Administration, Political Science or International Relations from a recognised research university **other** than Leiden University you are eligible for direct admission. Register through Studielink and complete your application in Leiden University's application system (uSis).

3. A bachelor's degree from an accredited research university provided the student meets requirements across two pillars. First, at least 30 ECTS obtained from courses in the fields of governance, crisis or security related knowledge. Second, at least 20 ECTS related to empirical research skills in social sciences or similar empirical research skills. Register through Studielink and complete your application in Leiden University's application system (uSis).

4. When you have a bachelor's degree in Safety and Security Management Studies (SSMS) at The Hague University of Applied Sciences and have fulfilled the [following academic criteria](#).

Please note: you will have to apply through Studielink and the subsequent uSis application portal.

Further, you still must meet the English language proficiency requirement mentioned in the paragraph 'Language Requirements' below.

If you meet the conditions under 1, you only need to apply through Studielink. If you do not meet the conditions under 1, you will need to apply through Studielink and through the online application system (uSis). You will be assessed on an individual base on [proficiency in the English language](#) and the requirements mentioned in 'Elaboration'.

Language requirements

IELTS/TOEFL/Cambridge:

- IELTS 6.5
- TOEFL (internet-based) 90
- CPE or CAE 180

The test result may not be older than two years at the time of enrolment for the programme.

Exemption:

You are eligible for exemption from submitting results of an English proficiency test, if you meet one of the following requirements:

- An International Baccalaureate diploma from a programme taught in English (or an IB diploma with English A);
- A diploma of secondary or higher education completed in Australia, Canada (with the exception of the French-language programmes in Canada), Ireland, Malta, New Zealand, Singapore, the United Kingdom, the United States or South Africa;
- A diploma of an English-taught university degree programme completed at a Dutch research university;
- A pre-university education (VWO) diploma;
- A bachelors' or masters' diploma from a Dutch university of applied sciences of an English taught programme if all instruction and examinations were held in English.

For detailed information, including exemption criteria and methods of submission, refer to [English language proficiency](#).

English tests accepted

Results may not be more than two years old!

- IELTS: academic modules only
- TOEFL: internet based
 - We do not accept TOEFL My Best™ scores (multiple test scores combined). The sufficient score must be obtained in one individual test. Also not accepted are institutional tests such as ITP.
 - We are able to accept the TOEFL Special Home Edition™ for admission to the academic years 2020-2021 and 2021-2022.
- Cambridge English Exam C2 Proficiency or C1 Advanced, depending on admission criteria

Please note: You do not have to submit proof of proficiency if you have completed your education in Australia, Canada (with the exception of the French-language programmes in Canada), Ireland, Malta, New Zealand, Singapore, the United Kingdom, the United States or South Africa; or when you hold an International Baccalaureate, or for Dutch students, if you have completed VWO level English or an English-taught bachelor at a Dutch Research University.

Holders of a bachelor's degree from a research university with a maximum of 5 ECTS of deficiencies, can eliminate their deficiencies in the curriculum by showing relevant knowledge with their extracurricular courses as shown on the below table:

Pillar 1: Governance, crisis and security	At least 30 ECTS obtained at a recognised research university in courses in the field of	If you do not meet the requirements specified in the cell to the left, and your deficiency is a maximum of 5 ECTS, this can be bridged by doing 3 MOOCS on governance, crisis and/or security by a recognised research university. Official certificates must be obtained
--	--	---

related knowledge	governance, crisis or security knowledge.	for these courses. Examples are: MOOCS related terrorism studies, crisis governance, cybersecurity governance, and risk in a modern society, etc
Pillar 2: Empirical research skills in social sciences	<p>At least 20 ECTS of the course curriculum at a recognised research university is related to empirical research skills in social sciences.</p> <p>Please note that ECTS obtained for a thesis are only considered when it concerns an empirical research project in the social sciences.</p>	<p>If you do not meet the requirements specified in the cell to the left, and your deficiency is a maximum of 5 ECTS, this can be bridged by doing 3 MOOCS on empirical research skills in social science by a recognised research university. Official certificates must be obtained for these courses. Examples are: MOOCS related to quantitative research methods, qualitative research methods, research design, social science methods, etc.</p>

The above elaboration on the requirements give an indication whether you will be admitted or not. At the same time, there are no assurances given. The first step by the Board of Admission is to examine the degree obtained. If this degree significantly differs in content from the master programme (e.g.: a degree in biology, physics, mathematics, industrial engineering, language studies), it will not be possible to bridge these deficiencies by online courses.

- Bachelor degree in international studies:
watch out for deficiencies in research skills. Make sure to submit writing samples, follow electives that are methodological in nature, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in criminology:
watch out for deficiencies in the governance aspect. Make sure to follow electives that include this (e.g. on the organization or management of police forces), and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in history:
watch out for deficiencies in the governance aspect, and brush up on research skills. Make sure to submit writing samples, follow relevant electives, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in law:
watch out for deficiencies in crisis and security related topics (a course on criminal law is as such not sufficient), and especially research skills. Make sure to submit writing samples, follow relevant electives, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Bachelor degree in psychology:
watch out for deficiencies in the governance aspect. Follow relevant electives, and complete the online courses if there is still a maximum 5ECTS deficiency.
- Master degrees in the above fields:
a Master degree should strengthen your knowledge on at least empirical research. Make sure to submit writing samples.
- Bachelor or Master degree from a University of Applied Sciences (HBO):
though these programmes might touch upon one or even both pillars in the curriculum, they do so

from a perspective of applied sciences. Hence applicants lack theoretical background needed to start the Master's programme. It will almost be impossible to adhere to the requirements.

Minor

Finally, a minor programme can be a great way to increase knowledge on the two pillars. Currently, the Institute of Security and Global Affairs offers five minor programmes, but other minor programmes may also prove valuable:

- [Security, Safety and Justice](#): the different courses touch upon each of the two pillars.
- [Intelligence Studies](#): the different courses touch upon each of the two pillars.
- [Global Affairs](#): the different courses concentrate on crisis, security and governance topics.
- [Violence Studies](#): the different courses concentrate on crisis, security and governance topics.
- [Cybersecurity and Cybercrime](#): the different courses concentrate on crisis, security and governance topics.

>> [Go to the next step: Check the application deadlines](#)

2022 - 2023

Admission requirements for students who will start in September 2022 and in February 2023.

(a) When you have a bachelor's degree in Security Studies from Leiden University, you are always eligible for direct admission. You can register through Studielink

(b) When you have a bachelor's degree in Safety and Security Management Studies (The Hague University of Applied Sciences) and have fulfilled the following academic and administrative criteria, your application to the Msc programme 'Crisis and Security Management' of Leiden University will be accepted:

- a bachelor's degree in Safety and Security Management Studies (SSMS) from The Hague University of Applied Science;
- At least minimum GPA of 7.5 for all the following courses combined:
 - * Year 2
 - Safety Risk Management
 - International Relations and Geopolitics
 - National Security Systems
 - Managing International Conflict
 - * Year 3
 - Interorganisational Cooperation
 - Rethinking Safety and Security
 - Thesis Research Skills
 - Thesis Research Tutorial

- a minimum grade of 7.5 for each of the following elements in year 4
 - Written Thesis
 - Thesis Defence

Please note: you will have to apply through Studielink and the subsequent uSis application portal. Further, you still must meet the English language proficiency requirement mentioned in the paragraph 'Language Requirements' below.

(c) If you don't meet the conditions under a or b, you will need to apply through Studielink and through the online application system. You will be assessed on an individual base. The assessment will be based, amongst others, on:

- Demonstrable knowledge of relevant contemporary and emerging security and/or crisis related challenges, and relevant developments in a globalized world;
- Demonstrable knowledge of the interlinkages of actors, approaches, consequences and possible impacts of security and/or crisis related issues (governance perspective);
- Demonstrable ability to theoretically, conceptually and/or empirically develop a research project, and subsequently analyse it using relevant research skills, with a focus on social science research skills;
- Proficiency in the English language: see next paragraph for details.

IELTS/TOEFL/Cambridge:

- IELTS 7.0 (A minimum score of IELTS 7.0 required for each of the four components);
- TOEFL (internet-based) 100. A minimum score of TOEFL 25 is required for each of the four components.
- CPE or CAE 185

Exemption:

You are eligible for exemption from submitting results of an English proficiency test, if you meet one of the following requirements:

- A diploma of secondary or higher education completed in the United States of America, the United Kingdom, Ireland, New Zealand, Australia or Canada (with the exception of French-taught education in Canada);
- A diploma of an English-taught academic Bachelor programme completed at a Dutch research university;
- A Dutch pre-university education (VWO) diploma.

Detailed information English language proficiency

For detailed information, including exemption criteria and methods of submission, refer to [English language proficiency](#).

English tests accepted

Results may not be more than two years old!

- IELTS: academic modules only
- TOEFL: internet based
 - We do not accept TOEFL My Best™ scores (multiple test scores combined). The sufficient score must be obtained in one individual test. Also not accepted are institutional tests such as ITP.
 - We are able to accept the TOEFL Special Home Edition™ for admission to the academic years 2020-2021 and 2021-2022.
- Cambridge English Exam C2 Proficiency or C1 Advanced, depending on admission criteria

Please note: You do not have to submit proof of proficiency if you have completed your education in Canada (except French-taught programmes in Canada), USA, UK, Ireland, New Zealand or Australia, or when you hold an International Baccalaureate, or for Dutch students, if you have completed VWO level English or an English-taught bachelor at a Dutch Research University.

- Include a placement letter in English, in which you explain how you meet the admission requirements. Shortly refer to your personal and professional background and interests to explain how well you fit into the programme, and how it will help you to achieve your future goals. Make sure to use [this template](#).
- Include an up-to-date Curriculum Vitae. This also serves to help the Board of Admissions form an impression of you and gain further insight in your experiences (work and/or education) that might contribute to establish admissibility to the programme.

Applicants to the Crisis and Security Management MSc programme can show proficiency in the three pillars of Crisis and/or Security related topics, Governance and Empirical Research skills in Social Sciences via different ways.

The table below shows per pillar how applicants should show proficiency; Please note that the value of the columns differs. While you can show relevant knowledge either by your curriculum or your work experience (so these are functionally equal), the extracurricular column is meant to eliminate smaller deficiencies in the curriculum, and is not sufficient by itself.

	By Curriculum	Or: By Work experience	Or: By Extracurricular
	At least 20 ECTS of the course curriculum at a research university is related to crisis or security knowledge.	High level political function or higher	If the course curriculum at the research university is at least 10 ECTS related to crisis or security knowledge, OR if 30 ECTS of the course curriculum at a university of applied

Crisis and Security related knowledge	<p>Examples are: war studies, conflict theories, organizational crises, criminology, security studies, diplomacy, cybersecurity, terrorism studies, and intelligence studies. If the name of the course does not clearly state this relationship (e. g.: international politics), course descriptions or syllabi can be used to show a link.</p> <p>Writing samples can also be used to showcase relevant knowledge.</p>	<p>management in a public/private/civil society organization. Either the goals of the organization or the tasks related to the function should be related to crisis or security matters.</p>	<p>sciences is related to these topics, online courses can be used to bridge the deficiencies.</p> <p>Examples are:</p> <ul style="list-style-type: none"> - Coursera course “Terrorism and Counterterrorism” - Coursera Course “Risk in Modern Society” - Coursera course “Security and Safety Challenges in a Globalized World” <p>Certificates must be obtained for these courses</p>
Governance knowledge	<p>At least 20 ECTS of the course curriculum at a research university is related to governance knowledge.</p> <p>Examples are: (public) management, organizational management, network management, and (international) politics. If the name of the course does not clearly state this relationship, course descriptions or syllabi can be used to show a link.</p> <p>Writing samples can also be used to showcase relevant knowledge.</p>	<p>High level political function or higher management in a public or civil society organization.</p>	<p>If the course curriculum at the research university is at least 10 ECTS related to governance knowledge, OR if 20 ECTS of the course curriculum at a university of applied sciences is related to the topic, online courses can be used to bridge the deficiencies.</p> <p>Examples are:</p> <ul style="list-style-type: none"> - Coursera course 'Organizational analysis' - Coursera course 'The Changing Global Order' - Coursera course 'Political Economy of Institutions and Development' <p>Certificates must be obtained for these courses</p>
Empirical Research	<p>At least 15 ECTS of the course curriculum at a research university is related to empirical research skills in social sciences. Examples are: bachelor thesis, methods of social science research, qualitative analysis, and quantitative analysis. If the name of the course does not clearly state this relationship,</p>	<p>Research papers written in the course of</p>	<p>If the course curriculum at the research university is at least 5 ECTS related to research skills in social sciences, OR if the course curriculum at the research university is at least 15 ECTS related to skills in non-social science research, OR if 15 ECTS of the course curriculum at a university of applied sciences is related to research skills in social sciences, online courses can be used to bridge the deficiencies.</p>

skills in Social Sciences	<p>course syllabi can be used to show a link.</p> <p>Writing samples can also be used to showcase relevant knowledge.</p>	<p>professional activities. Please provide samples.</p>	<p>Examples are:</p> <ul style="list-style-type: none"> - Coursera course 'Quantitative methods' - Coursera Course 'Qualitative Research Methods' <p>Certificates must be obtained for these courses</p>
----------------------------------	---	---	--

The above elaboration on the three pillars give an indication whether you will be admitted or not. At the same time, there are no assurances given. The first step by the Board of Admission is to examine the degree obtained. If this degree significantly differs in content from the master programme (e.g.: a degree in biology, physics, mathematics, industrial engineering, language studies), it will not be possible to bridge these deficiencies by work experience or online courses. Here are some general guidelines for your convenience (again, non-exhaustive, and no assurances can be given that this will guarantee you admission):

- Bachelor degrees in public administration, political science, international relations: generally the three pillars are already present in the curriculum. Make sure that there is a strong relationship with crisis and security related topics.
- Bachelor degree in international studies:
watch out for deficiencies in research skills. Make sure to submit writing samples, follow electives that are methodological in nature, or complete the online courses.
- Bachelor degree in criminology:
watch out for deficiencies in the governance aspect. Make sure to follow electives that include this (e.g. on the organization or management of police forces), or complete the online courses.
- Bachelor degree in history:
watch out for deficiencies in the governance aspect, and brush up on research skills. Make sure to submit writing samples, follow relevant electives, or complete the online courses.
- Bachelor degree in law:
watch out for deficiencies in crisis and security related topics (a course on criminal law is as such not sufficient), and especially research skills. Make sure to submit writing samples, follow relevant electives, or complete the online courses.
- Bachelor degree in psychology:
watch out for deficiencies in the governance aspect. Follow relevant electives, or complete the online courses.
- Master degrees in the above fields:
a Master degree should strengthen your knowledge on at least empirical research. Make sure to submit writing samples.
- Bachelor or Master degree from a University of Applied Sciences (HBO):
though these programmes might touch upon one, several, or even all of the three pillars in the curriculum, they do so from a perspective of applied sciences. Hence applicants lack theoretical background needed to start the Master's programme. We strongly recommend to follow relevant additional courses at University level, or to complete all of the online courses suggested above (or similar ones).
Make sure to submit writing samples as well that demonstrate your abilities in research (methodology and research design).

Minor

Finally, a minor programme can be a great way to increase knowledge on the three pillars. Currently, the Institute of Security and Global Affairs offers three minor programmes, but other minor programmes may also prove valuable:

- [Security, Safety and Justice](#): the different courses touch on each of the three pillars.
- [Global Affairs](#): the different courses concentrate on crisis and security topics, and to some extent governance issues.
- [Intelligence Studies](#): the different courses concentrate mainly on crisis and security topics.

Application deadlines

Application deadlines

- If you need a visa or residence permit, you must apply for admission before **1 April**. The same deadline applies to students who already have a Dutch residence permit for study purposes and need to extend it.
- If you do not need a visa or residence permit, you must apply for admission before **15 May**.

- If you need a visa or residence permit, you must apply for admission before **15 October**.
- If you do not need a visa or residence permit, you must apply for admission before **15 November**.

Please note: As of 2025 we will only offer a limited February intake: only the specialisation Governance of Violence will be open for registration in February 2025. If you would like to follow one of the other specialisations please consider applying for the September 2024 or the September 2025 intake.

Apply early!

If you do not have a Dutch diploma that grants direct admission or you need to meet additional admission criteria, you'll have to complete a two-part application procedure:

- First register your application(s) in the national system Studielink.
- A day later you will receive log-in details for Leiden University's application system (uSis), where you can complete your application.

You must submit your application via Leiden University's application system (uSis), before the deadlines mentioned above. So don't delay; if you haven't registered in Studielink and activated your uSis account in time to apply by the deadline, you'll miss out!

Other deadlines

Leiden University reserves a limited number of rooms each year for international students. However, as the number of housing requests always greatly exceeds the number of rooms available, we strongly recommend

that you also look into other housing options at the same time. [Read more about how and when to arrange housing](#). If you want to request accommodation via Leiden University, submit both your application for admission and your housing request well before the deadlines! Accommodation is offered on a first-come first-served basis and is not guaranteed. You don't have to await admission before requesting housing.

If you want to apply for a scholarship, grant or loan, please bear in mind that different deadlines apply, and these deadlines can often be earlier. Deadlines vary per scholarship. Visit the [scholarship website](#) for more details.

>> [Go to the next step: Collect the required documents](#)

Required documents

When you apply for admission, you'll be asked to submit several documents.

Note: If you have a Dutch diploma that grants direct admission, you will generally *not* be asked to submit additional documents.

Required application documents

You'll need to submit the following documents:

Please upload a copy of the page(s) in your passport containing your personal details and photograph. If you are from the EU/EEA, you can submit a copy of your identity card instead. Please upload copies of both sides.

If you are a non-EU/EEA national already living in the Netherlands, upload copies of both sides of your Dutch residence permit.

It is not mandatory, but please include an up-to-date Curriculum Vitae. This serves to help the Board of Admissions to form an impression of you and gain further insight in your experiences (work and/or education) that might contribute to establish admissibility to the programme. Please write your CV (curriculum vitae) in English and make sure it contains your basic personal data, as well as a clear overview of your educational and professional history to date.

You can apply for admission before receiving the results of your English language test. However, a sufficient result will then be a condition of your eventual admission. Of course, if you already have your English language test results, you can upload them directly.

- Digital copies of diplomas and transcripts are initially required. Once you have been admitted, we will inform you how to submit certified copies.

- The documents must be in the original language. If they are not in English, Dutch, German or French, they must be accompanied by official translations into one of these languages.
- If you have not yet completed your current programme, state your expected graduation date and submit copies of all transcripts obtained to date plus an official list of subjects still to be completed.

Additional requirements specific to Crisis and Security Management

It is not mandatory, but please include a placement letter in English, in which you explain how you meet the admission requirements. This serves to help the Board of Admissions gain further insight in your experiences (work and/or education) that might contribute to establish admissibility to the programme. Make sure to use [this template](#).

You can download the template, fill it in, and add it to your application. List relevant academic courses or other relevant academic experiences (such as internships, summer courses, thesis or extra-curricular research), including if applicable the amount of ECTS or credits assigned to them. For everything you list, it is recommended you hand in supporting documents, such as course descriptions, syllabi or writing samples. You can upload supporting documents via the application portal in uSis (ideally, integrate the supporting documents into one pdf).

>> [Go to the next step: Start your application](#)

Application procedure

The application procedure is broken down into three parts.

Part 1. Application in Studielink

All students applying for a degree programme at Leiden University must start the application process in Studielink, the national online registration system for students wishing to follow a degree programme at a Dutch university. Studielink is open for applications from 1 October in the year preceding the academic year in which you wish to start.

1. Go to [Studielink](#) and enter your details according to the instructions provided. For this step you will need:

- a copy of your valid passport or European ID card, or
- if you are a Dutch resident, your [DigiD](#)

Be aware! If you wish to apply for a specialisation of a master's programme: first select the master's programme in Studielink, then select the specialisation for which you wish to apply in Step 4 (Institutional Questions) in Studielink.

2. Within two days you will receive:

- an email with information on the next steps you'll need to take;
- your university ULCN student account details (unless, of course, you already have a ULCN account)
- the link to Leiden University's online application portal (uSis)

After receiving your ULCN student account details, log into Leiden University's online application portal (uSis), using the link provided. Here you can view the status of your application, which will be one of two possibilities.

1. You can be directly admitted

If your (Dutch) diploma grants you direct admission, Leiden University's online application portal (uSis) will let you know. The portal provides an overview of what you have to do to complete your application, for example arranging housing, scholarships, applying for a visa/residence permit and insurances. Please follow the instructions carefully and proceed to step 3 Student registration.

2. You cannot be directly admitted: additional action is required

If you do not have a (Dutch) diploma that grants you direct admission, we will require additional documents to allow us to decide about your application. The online application portal (uSis) will tell you this and explain how to do so. See also Part 2: Admission to Leiden University.

MSc. Crisis and Security Management: How to apply via Studielink?

Due to the selected cookie settings, we cannot show this video here.

[Watch the video on the original website or](#)

Accept cookies

Part 2. Admission to Leiden University

If you cannot be directly admitted, you must apply for admission via Leiden University's online application portal (uSis). Please follow all steps below.

In our online application portal (uSis) you can finalise your application by uploading the necessary documents and answering a few questions. This portal provides an overview of what you need to do to complete your admission application. Please follow the instructions carefully and make sure to include all the items that are asked for. We strongly recommend that you complete your application well in advance of the application deadline.

All applicants with an international degree must pay a **non-refundable** €100 application fee, which entitles you to apply for up to three programmes/specialisations in the same academic year. We cannot start processing your application until we receive this application fee, so please pay it as soon as possible. The online application system explains how you can pay it.

Can I be exempted from paying the application fee?

You do *not* have to pay the application fee if:

- You are following, or have completed, a bachelor's degree at a Dutch university (of applied sciences).
- You have previously registered as an exchange, bachelor's, master's or pre-master's student at Leiden University.
- You have previously been admitted to **the same** degree programme at Leiden University, but you decided to postpone your studies. This does *not* apply if you are applying for a different study programme or specialisation.
- You have refugee status in the Netherlands (with a residence permit for asylum).

Exemptions cannot be granted for any other reasons.

After you have submitted your application, the online application portal (uSis) will, if applicable, ask you if you want to apply for student housing, a visa/residence permit or a scholarship. Be sure to make a careful note of the relevant deadlines for these options.

After receiving your application fee payment (if applicable), the Admissions Office will check whether all the necessary documents have been uploaded and they will inform you by email whether any further items are required. The Board of Admissions of the faculty will then:

- decide whether you meet the admission requirements for the programme;
- strive to issue a decision on your completed application within four to six weeks of the University receiving it.

Once a decision has been reached you will be informed by email. You can view your admission status in the online application portal (uSis).

There are three possible outcomes:

1. **You are admitted**
You have met all conditions for admission.
2. **You are conditionally admitted**
You will be admitted, provided that you meet certain conditions. These conditions will be specified in the online application portal (uSis).
3. **You are not admitted**

The reason(s) for non-admission will be clearly stated in the online application portal (uSis). If you are informed that you have been (conditionally) admitted, you will have to take a number of additional steps.

If you are (conditionally) admitted, the Admissions Office will ask you to confirm whether you will join the study programme. You can do so in the online application portal (uSis).

1. Go to '[Application study programme](#)' in the online application portal (uSis).
2. Open the 'Confirm' screen. Here you will see three options:

- Yes, I want to study at Leiden University.
- No, I no longer wish to study at Leiden University and hereby withdraw my application.
- Maybe later; I do not wish to start this semester/academic year. I would like to receive further instructions by email.

The sooner the better

Confirm attendance as soon as possible, to avoid missing other important deadlines and information about your study programme.

Changing your mind

You can still change your mind if necessary, either in uSis or by contacting the Admissions Office [master team](#).

Deadline final decision

Do you need a student visa or residence permit? You can only request one after confirming attendance. So make sure to confirm attendance before the [visa/residence permit deadline](#).

If you don't need a visa or residence permit, the latest deadline for confirming attendance is before the start date of your study programme.

Part 3. Student registration

If you've been (conditionally) admitted, follow these steps to register as a student at Leiden University:

Check in the online application portal (uSis) whether you need to submit any documents to meet the conditions of your admission. Instructions on how to do so will be provided in uSis.

Arrange the payment of your [tuition fee](#) before the official start date of your programme. You will receive instructions and information on the available payment methods by email.

If you are an international student, go to the [Prepare your stay](#) page of our website for information about the practical matters you should take care of before and upon arrival. These include, for example, arranging housing, scholarships, applying for a visa/residence permit and insurances.

[>> Go to the next step: Pay your tuition fees](#)

Tuition Fees

Your tuition fee depends on a number of factors, such as your nationality and your previous Dutch higher-education qualifications.

The tuition fees for the academic year **2024-2025** are:

- Dutch, EU/EEA, Swiss and Surinamese students: €2,530 per year
- Non-EU/EEA students €20,900 per year
- Second Dutch master’s programme: €16,300 per year

The tuition fees for the academic year **2023-2024** are:

- Dutch, EU/EEA, Swiss and Surinamese students: €2,314 per year
- Non-EU/EEA students €19,300 per year
- Second Dutch master’s programme: €15,400 per year

More information about tuition fees

The tuition fee for this programme is €2,530 for the academic year 2024-2025 (statutory fee).
The tuition fee for this programme is €2,314 for the academic year 2023-2024 (statutory fee).

This tuition fee applies if this is your first master’s programme and you are a national of one of the following countries:

Austria	Latvia
Belgium	Liechtenstein
Bulgaria	Lithuania
Croatia	Luxembourg
Cyprus	Malta
Czech Republic	Norway
Denmark	Poland
Estonia	Portugal
Finland	Romania
France	Slovakia

Germany	Slovenia
Greece	Spain
Hungary	Suriname
Iceland	Sweden
Ireland	Switzerland
Italy	

The fee applies for both full-time and part-time study.

The tuition fee for this programme is €20,900 for the academic year 2024-2025 (institutional tuition fee).

The tuition fee for this programme is €19,300 for the academic year 2023-2024 (institutional tuition fee).

If you are not a national of an EEA country, Suriname or Switzerland, generally speaking you will have to pay an institutional tuition fee. This fee applies for both full-time and part-time study.

However, if, on the basis of your Dutch residence permit, you are eligible for student finance from the Dutch education agency (DUO) you are entitled to pay the statutory tuition fee. Information on qualifying residence permits can be found in the [DUO nationality chart](#).

Please note! If you will be studying at Leiden University via a cooperation agreement, the fees quoted in the agreement will apply.

Only applicable to EU/EEA, Swiss and Surinamese nationals.

The tuition fee for this programme is €16,300 for the academic year 2024-2025 (institutional tuition fee).

The tuition fee for this programme is €15,400 for the academic year 2023-2024 (institutional tuition fee).

If you are following a second Dutch master's programme you will generally have to pay an institutional tuition fee that is higher than the statutory tuition fee. Some exceptions apply.

Consult the [tuition fee flowchart for second master's programmes](#) to find out how much tuition fee you will have to pay.

Less than 45 EC

If you are going to follow a pre-master's or conversion programme after completing a bachelor's programme, and if the programme is less than 45 ECs, you will have to pay €39 per study credit (EC).

45 EC or more

For programmes of more than 45 ECs you will have to pay the statutory tuition fee. If the pre-master's or conversion programme is more than 60 ECs – and therefore longer than one year - or if you are going to follow courses that are not part of your conversion programme, you will have to pay the institutional tuition fee for the programme in question (see second study programme). These fees apply to students of all nationalities.

Scholarships, grants and loans

Leiden University offers a wide range of scholarships for students from specific regions of the world, or for specific programmes. Leiden University also offers the Leiden University Excellence Scholarship (LExS), a programme specifically designed for non-EU/EEA students enrolling in a master's programme. [Find out more about scholarships, grants, loans and deadlines](#)

If you are an EU/EEA or Swiss national and under 30, you may be eligible for a [loan from the Dutch government](#) to cover your tuition fees.

[>> Go to the next step: Prepare for your studies at Leiden University](#)

Prepare for your studies

You've been accepted! Leiden University looks forward to welcoming you as a new student. Your next step is to prepare for your studies. Below you can find some tips to help you get a head start as you embark on your studies at Leiden University.

For international students

If you are an international student, a wealth of information can be found on the '[Prepare your stay](#)' page of our website. This includes information about visas, housing, financial matters, what to arrange upon arrival, and much more.

For Dutch students

- The '[student website](#)' page on Leiden University's student website contains information about practical aspects, introduction weeks and student associations. It's also a handy source of study-related information and advice.
- For detailed information about courses, schedules and reading materials, check out the [Prospectus](#).

Sign up for the introduction week in [Leiden \(OWL\)](#) or [The Hague \(HOP\)](#)! It's the best way to get acquainted with student life and the student cities of Leiden and The Hague.

Your student card is your proof of registration as a student of Leiden University. You can find your digital student card in the Leiden University app three days after your student registration is finalised. Read more about your student card [here](#).

As soon as you receive notification that your student registration has been finalised you should apply for a Leiden University ID card, or LU-Card. It also serves as your library card, print & copy card and access pass. Read more about applying for an LU-card [here](#).

Student life

The Hague is the international city of peace and justice, home to many international organisations, embassies and multinational corporations but also a fun student city filled with music, cafes, museums and the most popular beach in the Netherlands!

The Hague student city

Studying on the CSM means you have full access to all the services and facilities Leiden University offers. Leiden and The Hague, two great student cities just 10 minutes away by train! Leiden offers you the university's libraries, student and cultural associations; while the Hague is lively, close to the Netherlands' most popular beaches, a thriving hub of expat culture and European politics and foreign affairs - with a great transportation system. [More information](#)

Study Association Custodia

Study associations are very active and organise all sorts of great study-related activities, from debates and lectures to excursions and social drinks. What better way to get to know your fellow students? [L.S.A. Custodia](#) is the study association for the bachelor Security Studies and the master Crisis and Security Management. In the beginning of the academic year, Custodia will inform you about membership and activities.

Other associations

As well as the various student associations, you can also find other associations and clubs in Leiden and The Hague for people with similar interests and backgrounds. [More information](#)

Housing

Student housing procedures and norms vary greatly from country to country. In the Netherlands, most universities do not have their own dormitories and students generally arrange their own accommodation. Find out how you can arrange your student housing. Make sure to start early! Affordable rooms are in short supply. [More information about housing](#).

Studying with a disability

At Leiden University we make every effort to ensure that students with a functional disability or learning disorder can still follow the programme of their choice. [The Fenestra Disability Centre](#) is there to provide practical support and the relevant information.

VR Tour The Hague

Curious to know how studying in The Hague looks like? Take our VR tour through The Hague!

Studying the Master Crisis and Security Management at Leiden University in The Hague means you have full access to all the services and facilities Leiden University offers in both Leiden and The Hague. Two great student cities just 10 minutes away by train! Close to the Netherlands' most popular beaches, The Hague is a thriving hub of expat culture and European politics and foreign affairs - with a great transportation system. More information on studying in The Hague can be found [here](#).

Accept cookies

Leiden University- alumna Franciska will show you around our Campus in The Hague and visit the hotspots that make the city of The Hague an attractive place to study, work and live. If you don't have VR-glasses, just move your mouse around the screen and discover The Hague.

Information activities

Get to know us through our online and in-person events for prospective students!

Are you thinking about joining this Master's programme, and want to determine if it will be the right fit for you? Below, you can browse the events that we have coming up, and sign up to experience Leiden University and the programme for yourself. Alternatively, take a look at the Master Talks videos to find out more about the programme or check out our virtual campus tours!

Upcoming events

Thinking about doing a master's degree and wondering what Leiden University has to offer? Visit us on campus during the Master's Open Day on 14 February 2025. Discover which of our master's programmes taught in Leiden or The Hague suits you best. We're ready for your future!

Master's Online Open Days

The Master's Online Open Days (**5-6 October**) are your opportunity to learn everything you need to know about our master's programmes and how they can help you reach your goals. Attend presentations, meet our lecturers, learn about the careers of our alumni and hear first-hand the experiences of students and graduates on life at Leiden University.

[Find out more about the Master's Online Open Days here!](#)

Student for a Day

If you want to know whether your preferred master's is a good fit with your needs, try checking it out first-hand by actually spending a day at Leiden University.

What is Student for a Day?

It's your opportunity to ask all you want to know about the programme from a current master's student, attend an online lecture and get first-hand experience of what it's like to specialise in the master's of your choice.

[Read more about a student for a day](#)

Personal guided tours by a student ambassador

If you can't join one of the information activities, or you are visiting The Netherlands and you are interested in visiting the Campus and in more information about this programme? Please contact your student ambassador for a personal guided tour.

Master Talks: Programme videos

On the [Master Talks: programme videos platform](#) you can find videos for each master's programme. This includes a video which gives a short introduction to the programme and the recording of the in-depth presentation during the Master's Online Open Days.

Get to know the campus

Check out our virtual campus tours, filmed in 360 degrees – by dragging the video, you can look around at the surroundings yourself. Below is the video recorded at Campus The Hague - Wijnhaven, where most of your lectures will take place; you can also view other 360 campus tours of the various university faculties [here](#).
